Further, women are turning their attention to matters of local government, especially to city and town government, and they are considering thoughtfully the problems of municipal housekeeping. This means that woman must become familiar with the existing form of government and learn how that government may be improved. The commission form of government and the City Manager plan will, very naturally, then be discussed in this course.

Whatever seems needed by the group of women gathered in class will doubtless be discussed. Certainly women, if they are to become vital factors for better conditions, must have a clear knowledge of what takes place within the "inner circle" of a party in order that they may successfully combat and overcome any pernicious forces. This would mean that the group discuss local, state and national committees, campaign funds, etc., and ways in which to successfully prevent fraud at elections.

# SCHOOL SAVERS ARE DOING SPLENDID WORK IN THRIFT CAMPAIGN

MANY SOCIETIES FORMED AND  
MEMBERS ARE NOW BUSILY  
WATCHING THEIR MONEY  
GROW

Teachers and children are enthusiastic over the new thrift spirit in the school room, which has already resulted not only in giving a novel and practical interest to time honored subjects, but in the organization of approximately 11,000 school savings clubs in the schools of this district. Last year the gross sales of Thrift and War Savings Stamps and Treasury Savings Certificates in the fifth district amounted to more than \$2,315,000 during the school session, and it is hoped that when the figures are compiled for the 1920-1921 session, an even better record will be shown.

Thousands of penny and nickel savings books, text leaflets in thrift and wall charts for showing the records of savings clubs have been mailed out to schools asking for them. Boys and girls are learning to put their money into government savings securities instead of wasting it, and in order that they may not look upon savings as an end in itself, and gain a false conception of thrift as a form of stinginess, they are encouraged to save for some definite, worth-while object such, for instance, as a college education or business capital.

Saving is only a third of the game, however, for the youngsters earn much of the money they save and invest in Thrift and Savings Stamps. Weeding tobacco, running errands, clerking in stores, washing dishes, raising vegetables and live stock are some of the callings in which school savings club members engage during summer vacations and after school hours, and keen is the rivalry among them.

Even the smallest tots are taking an active part in the "Earn and Save" movement, and patriotic teachers who understand the value of thrift as an element of good citizenship are devoting their time and thought to making it part of their educational work, and are also encouraging the organization of savings clubs by the children themselves. They realize that they are rendering a real service to the country by teaching sound economic thought, practical patriotism and prosperity.

## GIVING SPLENDID AID

Postmasters are giving splendid co-operation in the effort to create new capital by increasing the number of investors in government savings securities. Approximately 300,000 letters have been distributed by them since the middle of February to patrons of their offices, through post office boxes or by means of the regular carriers, calling attention to the fact that the man who saves even a dollar out of his income has to that extent become a capitalist, and to the absolute safety of government securities as investments for such savings. The postmasters are to be congratulated not only for helping to finance the government but for making their influence felt in behalf of the welfare of their own communities. Distribution of these letters means that the benefits of saving and sound investment have been brought directly to the attention of thousands of persons in Maryland, the District of Columbia, West Virginia, Virginia and the two Carolinas.

## SMALL CAPITALISTS RAPIDLY INCREASING

GROWING NUMBER OF MODEST  
INVESTORS CONSIDERED SIGN  
OF NATIONAL PROSPERITY

One of the most hopeful signs for the future of this nation is the ever-increasing list of small investors. This movement, which gained such great stimulus through the issue of Liberty Bonds, is now continuing with added momentum. Having once tested the joys of coupon clipping, having learned the rewards of economy and thrift, the man of small means has become an inveterate investor.

Never before has the absolute safety of investment in government securities been so coupled with opportunity for sure profit as at the present time. Liberty Bonds, Treasury Savings Certificates and Savings Stamps offer the chance for every man, woman and child to join the ranks of the capitalists and to do so without inconvenience or danger of loss.

Equally important is the effect on the habits of the people. The movement strikes directly at the national vice of extravagance. Already it has done much to change the United States from a nation of spenders to a nation of savers and the end is not yet.

Practice thrift and saving for thirty days and you will never abandon the habit. In that time you will have learned what it means to you.

Thrift Stamps pave the road to prosperity.

Anyone can be a failure! It takes intelligence, thrift and hard work to be a success.
